1. C.V. = 8.5%, and df for EMS = 36.
2. The F-test indicated no statistical difference at the alpha = 0.10 probability level; therefore a LSD value was not calculated.

**Bolding** indicates entries yielding equal to highest yielding entry within a column based on Fisher’s protected LSD (P = 0.10).

Seeding Rate: 27 seed/foot in 7” rows.

Soil Type: Tifton sandy loam.

Soil Test: P = Medium, K = Medium, and pH = 6.1.

Fertilization: Preplant: 50 lb N, 50 lb P₂O₅, and 50 lb K₂O/acre. Topdress: 50 lb N/acre after 1st and 2nd harvests.

Management: Subsoiled and rototilled.

Previous Crop: Oat.

Test conducted by A. E. Coy, R. Brooke and D. Dunn.
